## Software Developer

### EXPERIENCE

---

*Junior Full Stack Developer: **LeadrPro**, Remote*

*February - March 2022*

- Provided technical expertise for designing, construction and execution of software solutions; maximized use of Events and promises in ES6 and React for application control flow
- Participated in learning of business, technical and organizational elements with team staff

*Front End Developer: **Big Daddy Unlimited**, Gainesville, FL*

*March - April 2021*

- Collaborated with CTO to determine needs and work through design options; identified UX pain points and provide knowledgeable recommendations for implementing unified user experience
- Worked with product designers and managers to design new and improved layouts to achieve usability and performance objectives and enhance user interactions

*Software Design Consultant: **Cabledrone LLC**, Jupiter, FL*

*February 2019 - November 2020*

- Evaluated software development projects and recommended adjustments; reviewed and evaluated technical design and technical quality issues and processes and developed production, test and beta websites using various software programs designed to interface with clients, software professionals and consultants

*IT Consultant (volunteer): **Reality Labs: Highlands Presbyterian Community Church***

- Constructed a wireless mesh network with 20 Wi-Fi access points, setup necessary equipment and services to become a mirror site for certain Linux and BSD distributions and managed a ProMax Cluster Management system to allow for the automatic spin-up of VMs of various operating systems

### EDUCATION

---

**Western Governors University**

*expected Spring 2023*

*B.S.: Software Development*

**Santa Fe College**

*December 2022*

*A.S.: Programming & Analysis*

#### Internships

*Software Developer **University of Florida**, Gainesville, FL*

*May - July 2022*

- Applied skills to evaluate, design, implement and optimize databases and database applications; developed data models and database designs to plan projects and implemented new feature to delete inactive users from database using Laravel and SQL

#### Certifications & Advanced Training

Computer Programming Specialist

Google IT Support Professional

Agile Foundations

Learning PHP

**Skills:** Web API, Shell, Database Architecture, Bootstrap, Styled Components, Figma, LESS, Ubuntu, Docker, HTTP/AJAX, Git

**Frameworks:** ReactJs, NodeJS

**Languages:** HTML, CSS, JavaScript, Laravel, PHP, SQL

### PROJECTS

---

**Library App-** [Live Demo](#), [GitHub Repo](#)

This project was created using React to allow the user to browse for books and add them to a shopping cart for checkout. The cart component allows editing the contents of the items selected and all form related fields are made using reusable components

**Food Truck Trackr-** [Live Demo](#), [GitHub Repo](#)

Application allows users to create an account as either an operator or diner in order to locate nearby food trucks. This app required building modular component-based frontends for existing API endpoints
